

Tecvac, Inc. Receives 2001 Award of Excellence For Concrete Repair

Tecvac, Inc. is the proud recipient of the National Capitol Chapter of The American Concrete Institute's *Year 2001 Award of Excellence In Concrete Repair* for work it performed at the historic Union Station in Washington, DC.

For the second year in a row, Tecvac has been recognized by its peers for completing a difficult project utilizing its exclusive vacuum processes. Using its proprietary TecSeal™ Process of negative force leak repair, technicians successfully mitigated a legion of chronic leaks within the station. Technicians also performed structural repairs to concrete and stone members without disturbing or marring the original fabric of the members. Tecvac, Inc. is an internationally recognized leader in innovative repair techniques for concrete, masonry and stone using vacuum technologies. Call today for more information.
